DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) The invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Herbert (U.S. Patent # 6,121,761).

Art Unit: 2838

Herbert discloses claimed subject matters a switched current power converter (figures 1-13), including a capacitor (figure 8, item C2), a plurality of constant current sources (figure 8, item I1, I2, I3), a plurality switches (figure 11, item 223 and 225) and a totem pole (figure 11, item 221), a data bus driver (figure 11, item A,B,C and D) and current from the source of constant current is directed to the power distribution circuit outside of the integrated circuit (figure 8, item Io).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herbert (U.S. Patent # 6,121,761) in combination with Work et al. (U.S. Patent # 6,111,359).

Herbert discloses claimed invention as explained in the claims 1-5 above, except the utilization of the technique for a ballast block with ferrite and sintered powdered metal.

Work et al. teaches the utilization of similar technique for a ballast block with ferrite and sintered powdered metal (column 9, line 10-65). It would have been obvious one having ordinary skill in the art at the time the invention was made to modify Herbert's switched

current power converter ballast by utilizing the technique taught by Work et al. for the purpose of providing Acoustic resonance protection to data bus.
